

## **TBT COVID Recommendations UPDATED September 15, 2022**

The TBT COVID Task Force (Leslie E. Sude M.D., Chair) is available to provide recommendation based on national, state, and local guidance. These recommendations are fluid and will be changed as the situation changes.

The TBT community can gather according to these guidelines.

1. TBT is open with limited use due to construction.
2. Masks are strongly recommended for all for indoor functions.
3. At this moment, there is no longer a limit to the number of people allowed to gather.
4. Custodial staff will continue to disinfect TBT offices and common spaces daily.
5. Clergy, staff, congregants, and visitors to the temple building should stay home if they feel ill in any way (upper respiratory symptoms, body aches, cough, congestion, tight chest, fever, diarrhea, or loss of smell or taste).
6. If any person tests positive and has been at a TBT activity in the 2 days prior to illness, please let the TBT staff know.
7. Preschool is now mask optional.
8. Religious School is mask optional.
9. All teachers are required to be fully vaccinated and boosted.

Please note that there are additional limits to the use of the temple building due to the renovation project. Construction currently prohibits large group meetings and services at TBT.
